

The Scientific Call for Applications

- Developing the **excellence** of our research according to the Foundation's strategic objectives
- Identifying and uniting **project leaders** in France and abroad with expertise in myology
- Enhancing the **technological offer** and strengthening support for myological research (platforms, support functions, breakthrough innovations)
- Encouraging **collaboration between teams in France or abroad** from all backgrounds (academic, associative, private, etc.)
- Accommodating the winners in a **new building** or contracting "off-site" teams

Who is concerned?

- Innovative, ambitious and daring **project leaders**, regardless of nationality or institution of origin (academic or private)
- Leading groups of different size and maturity, including
 - Junior groups
 - Starting, consolidator, advanced groups
 - Resident / visiting scientists

Key Dates:

- January 2023: **Launch** of the call for applications

Ongoing project submission

- Autumn 2023: **1st round** of assessment by the Scientific Advisory Board of the Foundation
- Late 2023: **1st response** to the applicants
- Early 2024: Label granting and implementation of collaboration contracts
- Summer 2024: Entrance of the first teams into **The future Foundation of Myology**

for patients*

**JOIN THE FUTURE FOUNDATION
TO BETTER UNDERSTAND
AND TREAT THE MUSCLE
IN EVERY CONDITION**

FONDATION
AMBITION DE
MYOLOGIE

MUSCLER LA VIE

Why a Foundation of Myology?

Context

Myology has grown in France, notably through the creation of the Institute of Myology, the establishment of regional myology centers, the creation of the Filnemus health network and the French Myology Society, all of which are supported by the AFM-Téléthon, and several international partnerships

Myology today in France

- 50 PUPH / MCUPH and many dedicated hospital practitioners
- 250 experts at the Institute of Myology
- 1 Filnemus network with 70 referent expert centers
- 400 people supported through strategic myology clusters

UNDERSTAND

TO PRESCRIBE,
REPAIR, IMPROVE

Ambition of the Foundation of Myology

Tomorrow, the future **Foundation's** objective is to **federate** all the national myology forces with international ambitions, to gain recognition for **Myology** and to develop new approaches in the field in order to:

- **Study, repair and strengthen muscle** in all its states
- **Bring together in one place**, at the highest level of excellence, care, fundamental and applied research, clinical research, evaluation of treatments and teaching
- **"University-ize"** myology with respect to the public health issues it represents
- **Serve the general interest** through discoveries on muscle for the benefit of all.

The future Foundation of Myology will be a **FRUP** (Foundation recognized as being in the public interest) **with a Board of Directors**.

The Foundation of Myology Tomorrow

- Comprehensive patient management (diagnosis, care, etc.)
- Clinical trials (I-Motion pediatric and adults)
- Research
- Neuromuscular Investigation Center (NIC): Myopathology, Physiology, Myobank, NMR
- Technical platforms (MyoVector, MyoImage, MyoLine, etc.)
- Databases and registers
- Training (AcadeMYO)
- Coordination and support for teams
- Spin-offs
