CENTRE de RECHERCHE en MYOLOGIE - CENTER of RESEARCH in MYOLOGY

Directeur : Bertrand Fontaine

Position available at the Center of Research in Myology, Paris.

A 1-year position of research assistant (corresponding to Ingénieur d'étude) is available at the Center of Research in Myology (UMRS 974 Inserm and Sorbonne Université, Institute of Myology, Paris, France). The position is in the team '*Muscle cell organization and therapy of dominant centronuclear myopathy*' headed by Marc Bitoun. The candidate will be involved in the development of a project entitled "Preclinical development of therapies by modulation of Dynamin 2 expression" aiming at developing a therapeutic approach for centronuclear myopathies.

Previous experience is not mandatory but skills in muscle histology, cell culture, muscle pathophysiology and/or therapy would be appreciated as well as expertise in classical technics of molecular biology and biochemistry.

The work will be performed at the Center of Research in Myology housed at the Institute of Myology (GHU Pitié-Salpêtrière, Babinski building, 75013, Paris, France).

Starting date: March 2024

Please send: CV, cover letter, and names with email address of referees to Marc Bitoun (m.bitoun@institut-myologie.org).
