

‘Proteomic tissue and biofluid markers of dystrophinopathy’

Pr Kay Ohlendieck, Maynooth University, Ireland

Monday 24/06 at 12am amphi F at 105 bd de l’Hopital

Kay Ohlendieck studied biology at the University of Konstanz. He has a PhD in Biochemistry from University College Cork and a DSc from University College Dublin. Following postdoctoral training at the University of Iowa and the State University of New York at Stony Brook, he worked as a Lecturer in the Pharmacology Department at University College Dublin. Since 2002, he is Professor & Chair of Biology at the National University of Ireland, Maynooth. His laboratory focuses on the biochemical and proteomic profiling of skeletal muscle in health and disease.
